

CLAIMS

We claim:

1. An article of clothing combination comprising:

a bikini top including;

a first panel and a second panel;

a first strap being elongated and having a first end and a second end, said first strap extending through said first panel;

a second strap being elongated and having a first end and a second end, said second strap extending through said second panel, said first and second straps being looped together such that said first panel is attached to said second panel, said first and second straps forming arm openings;

a bikini bottom including;

a third panel having a front edge, a back edge, a first side edge and a second side edge; and

a third strap being elongated and having a first end and a second end, said third strap extending into said front and back edges so that leg openings are formed between said third strap and each of said first and second side edges.

2. The article of claim 1, wherein each of said first and second panels has a generally triangular shape adapted for being positioned over and substantially covering a breast, each of said first and second panels having a peripheral edge including an upper edge, an inner corner and an outer corner, said inner corners being directed toward each other when each of said panels is positioned on a breast.

3. The article of claim 2, wherein said first end of said of said first strap extends into said outer corner of said first panel and outwardly of said inner corner, said first end of said first strap extending into said inner corner of said first panel and outwardly of said upper edge such that an inner loop formed by said first strap extends away from said inner corner of said first panel, said first end of said second strap extending into said outer corner of said second panel and outwardly of said inner corner and through said inner loop, said first end of said second strap extending into said inner corner of said second panel and outwardly of said upper edge of said second panel, each of said second ends of said first and second straps comprising a terminal loop, wherein each of said first ends may be extended through one of said terminal loops to form said arm receiving openings.

4. The article of claim 3, wherein each of said first and second side edges has a concave portion therein positioned between said front and back edges, a front portion being defined between said concave portions and said front edge and a rear portion being defined between said concave portions and said back edge.

5. The article of claim 4, wherein said third strap extends into said front edge and outwardly through said first side edge adjacent to said front edge, said third strap extending into said first side edge of said front portion such that a first loop is formed, said third strap extending along said concave portion of said first side edge and outwardly of said first side edge of said rear portion, said third strap extending through said first loop and into said first side edge adjacent to said rear edge, said third strap extending along said rear edge and outwardly through said second side edge adjacent to said rear edge, said third strap extending into said rear

portion of said second side edge and along said concave portion of said second side edge such that a second loop is formed, said third strap extending outwardly of said front portion of said second side edge and through said second loop, said third strap extending into said second side edge adjacent to said front edge, said third strap extending outwardly of said front edge such that said first and second ends of said third strap extend away from said front edge, wherein said leg openings are positioned between said first and second loops and said first and second side edges.

6. The article of claim 1, wherein each of said first and second side edges has a concave portion therein positioned between said front and back edges, a front portion being defined between said concave portions and said front edge and a rear portion being defined between said concave portions and said back edge.

7. The article of claim 6, wherein said third strap extends into said front edge and outwardly through said first side edge adjacent to said front edge, said third strap extending into said first side edge of said front portion such that a first loop is formed, said third strap extending along said concave portion of said first side edge and outwardly of said first side edge of said rear portion, said third strap extending through said first loop and into said first side edge adjacent to said rear edge, said third strap extending along said rear edge and outwardly through said second side edge adjacent to said rear edge, said third strap extending into said rear portion of said second side edge and along said concave portion of said second side edge such that a second loop is formed, said third strap extending outwardly of said front portion of said second side edge and through said second loop, said third strap extending into said second side edge adjacent to said front edge, said third strap extending outwardly of

said front edge such that said first and second ends of said third strap extend away from said front edge, wherein said leg openings are positioned between said first and second loops and said first and second side edges.

8. A bikini bottom comprising:

a panel having a front edge, a back edge, a first side edge and a second side edge, each of the first and second side edges has a concave portion therein positioned between the front and back edges, a front portion being defined between the concave portions and the front edge, a rear portion being defined between the concave portions and the back edge;

a strap being elongated and having a first end and a second end, the first end of the strap extends into the front edge and outwardly through the first side edge adjacent to the front edge, the strap then extending into the first side edge of the front portion such that a first loop is formed, the strap then extending along the concave portion of the first side edge and outwardly of the first side edge of the rear portion, the strap then extending through the first loop and into the first side edge adjacent to the rear edge, the strap then extending along the rear edge and outwardly through the second side edge adjacent to the rear edge, the strap then extending into the rear portion of the second side edge and along the concave portion of the second side edge such that a second loop is formed, the strap then extending outwardly of the front portion of the second side edge and through the second loop and then into the second side edge adjacent to the front edge, the strap then extending outwardly of the front edge such that

the first and second ends of the strap each extends away from the front edge.
